

## C# Software Developer

You want to be part of a young, dynamic team and make a difference? Then send an email including your salary expectations as well as a possible start date to [jobs@deepinvent.com](mailto:jobs@deepinvent.com) today! Please be sure to include job code *DEVMSS* in your message.

### Tasks

- Working independently on the development and advancement of new and existing projects around the MailStore software
- Evaluating expenses and feasibility of planned projects

### Skill Set

- College degree with emphasis on Information Technology or comparable work experience
- A minimum of three years experience in software development using C# / .NET framework
- Experience developing WinForms
- Experience developing web-based applications (HTML, CSS, JavaScript)
- Experience with current database technologies
- Basic knowledge of internet and email standards (e.g. HTTP, POP3, IMAP, SMTP, MIME, XML)
- Knowledge of highly scalable solutions (scalability, security, traceability and testability)
- Straightforwardness, commitment, reliability and a high level of social competence

### What You Can Expect

- A career with great future prospects
- An interesting and multifaceted job description
- An open and pleasant work atmosphere in a young and dynamic team
- Satisfied customers who are excited about using the software you developed
- Adequate compensation and the security of a continually growing company
