

MailStore Continuing Along the Path to Success

- 35,000 customers use MailStore to archive their email
- Managing Director Philip Weber is leading the way

Viersen, Germany, 04 August 2016 +++ MailStore Software GmbH, the German specialist for legally compliant email archiving solutions, is continuing along the path to success. Its number of customers continues to steadily rise: 35,000 customers in more than 100 countries rely upon the German company's email archiving software. MailStore expects to see this figure continue to rise in the future. "Our sales figures and the success of our national and international sales partners speak loud and clear: SMEs are increasingly recognizing the need to professionalize the way they handle email archiving. Our certified, legally compliant archiving is easy to implement and operates securely, which has persuaded managers and IT admins to choose MailStore," says Philip Weber, Managing Director (MD) at MailStore.

Philip Weber stays on as Managing Director

While the founding duo of Tim Berger and Stefan Schultze left MailStore in June 2016 to focus on new projects, Philip Weber is staying on in the position of Managing Director. Prior to the purchase of MailStore through Carbonite in 2014, Weber had been serving as Chief Operations Officer (COO) since 2007, and played a decisive role in sustainably structuring and expanding the company. He is now in charge of the management team, which consists of Daniel Weuthen (Director of Engineering), Christian Mussmann (Director of Technical Support), and Roland Latzel (Director of Marketing). Latzel came on board in June 2016, and will continue to expand the email archiving expert's digital marketing activities.

Channels are important growth factors

Weber and his team aim to penetrate the SME segment even more deeply in the future on both a national and an international level, in close strategic collaboration with parent company Carbonite. "We are sticking to our path and aiming for sustainable growth. We will achieve that by consistently continuing to develop our software, pursuing targeted expansion of our national and international channel activities, and promoting continued development within the company by taking measures such as making new hires," Weber continues.
