MailStore Launches Version 22.2: Support of Windows 11 and Server 2022

Support of the latest Microsoft operating systems offers flexibility and future-proofing / performance and security optimized too

Viersen, June 29, 2022 +++ [MailStore Software GmbH – an OpenText company](#), the German specialist in email archiving, is today releasing a new version, Version 22.2, of its email archiving solutions. Support of Microsoft's latest operating systems means that companies are guaranteed a maximum of flexibility and certainty going forward. The latest version also supports the latest encryption standard, TLS 1.3, which makes for added security during network communications. The .NET Framework that underlies our software, together with other third-party components, the internal database engine, and the client components for all databases used, have also been updated.

GDPR-Compliance certification

MailStore Server and MailStore Service Provider Edition 22.2 come with EU-GDPR certification, which demonstrates that when used appropriately, the software meets all the EU's requirements governing the processing of personal data.

Furthermore, both commercial products have been certified in accordance with the standards of the German Institute of Public Auditors (IDW) "Issuance and use of software certificates" (IDW PS 880). This certification takes account of all aspects of "generally accepted accounting principles".

Home Users Benefit Too

The free email archiving software for home users, MailStore Home, also benefits from the new version. MailStore Home now also supports the new Windows 11 and Windows Server 2022 operating systems. And home users can use TLS 1.3 (where available). Besides these new features, MailStore Home features several updates to enhance stability, security, and performance – including updates to the .NET Framework and the internal database engine.

"We want to provide our customers and users with email archiving software that is reliable, future-proof and supports legal and regulatory compliance requirements. So, it's crucial for us always to be at the cutting edge and to tailor our product to the latest market developments. So, today, I'm delighted to announce the release of Version 22.2 of our software, which supports not only the latest Microsoft systems but also state-of-the-art encryption," says Björn-Arne Meyn, Senior Product Manager at MailStore.

The new version of MailStore Server and MailStore Service Provider Edition are available right now and can be tested [here](#) free of charge. Home users can download the latest version of MailStore Home free of charge from the [Products](#) page of our website.

About MailStore

MailStore Software GmbH from Viersen near Düsseldorf, Germany, is a subsidiary of OpenText, "The Information Company" (NASDAQ: OTEX) (TSX: OTEX) and one of the world's leading providers of email archiving solutions. Over 80,000 companies, public authorities and educational institutions in more than 100 countries have placed their trust in the products of the German specialist.

Also, with its Service Provider Edition (SPE), MailStore offers a solution that is tailored to the needs of service providers, who are able to provide their customers with legally compliant email archiving as a managed service.

Our product portfolio also includes MailStore Home, a solution that enables individual home users to archive their private emails free of charge. MailStore Home is currently used by more than 1,000,000 people worldwide.
