MailStore launches version 22.3

Support for Outlook 2021, more security and improved usability

Viersen, September 21, 2022 +++ MailStore, the German specialist for email archiving, today launches the new version 22.3 of its MailStore email archiving solution. Effective immediately, MailStore Server and MailStore Service Provider Edition (SPE) offer support for Microsoft Outlook 2021, providing maximum flexibility and independence in the choice of email client.

In addition, the security of the solutions has been improved once again: For example, the new version prevents brute force attacks during login. Failed login attempts, i.e. the use of incorrect credentials, slow down the login process. This way, attackers cannot use brute force methods.

In addition, there is an improved user experience for MSPs using the MailStore SPE: Admins now have the option to change the automatic server-side execution of profiles via the API. This allows MSPs to save and customize system resources.

More information about the MailStore V22.3 release can be found in this blog post.

About MailStore

MailStore Software GmbH from Viersen near Duesseldorf, a subsidiary of OpenText, "The Information Company" (NASDAQ: OTEX) (TSX: OTEX), is one of the world's leading manufacturers of email archiving solutions. More than 80,000 companies, public authorities and educational institutions in more than 100 countries rely on the products of the German specialist.

In addition, MailStore offers the MailStore Service Provider Edition (SPE), a solution specifically for service providers who can use it to offer their customers legally compliant email archiving as a managed service.

MailStore Home is another product in the portfolio that allows individual users to archive their private emails free of charge. MailStore Home is currently used by over 1,000,000 users worldwide.
